0.4 Introduction & Synonyms

0.4.1 Foreword

This Capability List has been prepared in accordance with the current EASA / FAA Regulations as well as the company policies and supplies information about appliances or components, which can be maintained by DC Aviation GmbH.

The current Capability List is available at the Safety & Compliance Manager's office and is also accessible to all DCA-Personnel on the DC Aviation internal network.

NOTE

The FAA Repair Station Approval is only valid for the station "STR" (Germany) and it cannot be transferred to station "DWC" (Dubai).

0.5 Distribution List

This Form will be send to the Safety & Compliance Department for checking and the Luftfahrt-Bundesamt for approval (refer to Chapter **0.7 - Approval Page** and distributed over Web Manuals to all employees of DC Aviation.

0.5.1 Synonyms

In the column **EASA Rating** on the Capability List following synonyms are used:

C5 - Electrical Power

C14 - Landing Gear

In the column **FAA Rating** on the Capability List following synonyms are used:

ACC-2 - Electrical

ACC-AF - Airframe

Station definition:

STR = DCA Station Stuttgart

DWC = DCA Station Dubai

Designation of Maintenance options:

Electrical Power / Lights

Cap. Check = Capacity check

Rest. Check = Restoration Check

Gen. = General Overhaul

Landing Gear

O/H = Overhaul

T/C = Tire Change

NOTE

For SAFT and VARTA batteries the manufacturer's OEM Type reference rather than the actual OEM P/N was chosen as the designator for the Task Card number as the type reference is the most commonly used name for these batteries.

Aircraft Manufacturer P/N are given as a cross reference only where applicable.

Part of references are given when the CMM for the next higher assembly has to be used for component maintenance. This provides a traceable link to applicable maintenance documentation, which refers to the NHA only.

0.6 Amendment & Control

0.6.1 General

No work should be performed by this repair station on aircraft, engines and accessories if not listed in the Capability List, DCA-145 Form 139.

The Capability List as revised, indicates which components can be maintained by DC Aviation GmbH.

0.6.2 Amendment & Control

Before a new item will be added to the Capability List, the basic requirements (trained personnel, required tools, approved test equipment and approved technical data) have to be established i.a.w. to the DCA-MOE Chapter 1.11.3.

The Managers Maintenance have to investigate the efforts to be taken to establish these requirements.

It is within their responsibility to provide the Accountable Manager with the expected demand.

The Manager Maintenance to sign off the Capability List and forward it to the Safety & Compliance Department.

It is the responsibility of the Quality Manager to examine the established requirements and to sign off DCA-145 Form 139 for the company.

The Capability List will be reviewed in an interval of 6 months if not amended.

Any change within a sentence or paragraph will be marked in a blue font at the respective page; any change within the listing of Parts and P/N's itself will be marked with a yellow background.

As soon as the Approval Page has been returned, the Safety & Compliance Department will distribute the amendment of the Capability List according to the paragraph "Distribution List", refer to para. 4.
